

# Anodising Comparison Guide

---

Anodising vs Powdercoating

# Apples for Apples

## Been told anodising is too expensive?

It is important to compare the right anodising to the equivalent powder coating finish.

Category	Anodisers WA	Powdercoating Equivalent	Lower Specification
Durable	Exterior Smart AA20UM	Like for Like Alternative Spec	Specifying a lower grade Finish
		Dulux Electro	Dulux Duralloy
		Interpon Ultriva/D2015	
		Interpon D2525	

Category	Anodisers WA	Powdercoating Equivalent	Lower Specification
Ultra Durable	Exterior Plus AA25UM	Like of Like Alternative Spec	Specifying a lower grade Finish
		Dulux Flourosset	Dulux Electro
		Interpon Flouromax	Dulux Duratec
			Interpon Ultriva/D2015
			Interpon D2525

## When Specifying

### Anodising and Powdercoating have different perimeters

- Anodising is an immersion process and charges the entire surface area
- Powder coating charges face or visual only
- Anodisers WA price is on average 50- 60% less per m2
- Anodising covers on average 40% more area
- Anodising provides greater protection by covering all of the material not just visible or seen face

## Panels

- Anodisers WA price is inclusive of anodising both sides
- Powder coating price is for one side only
- Anodisers WA does not have any surcharges for E priming or warranty work

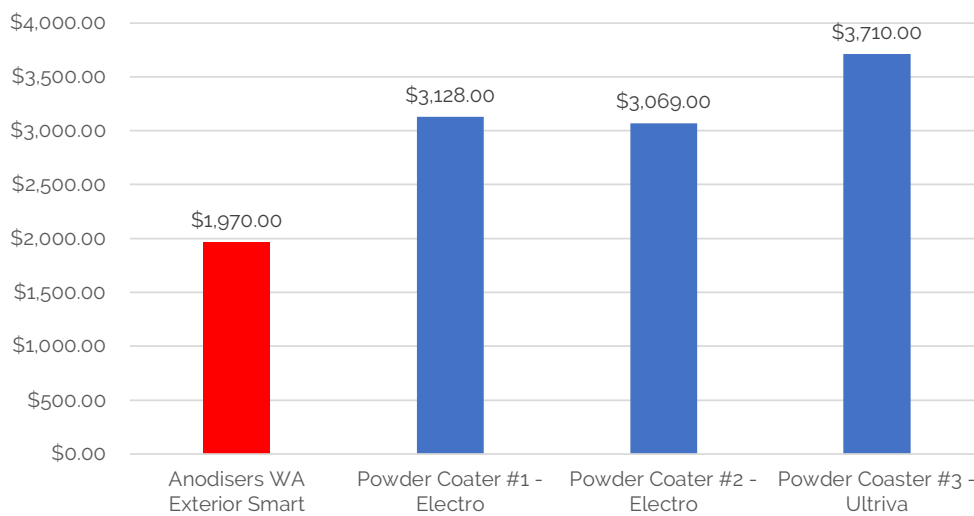

January 2021

# Anodisers WA undertook a price comparison with three Western Australia Powder coaters.

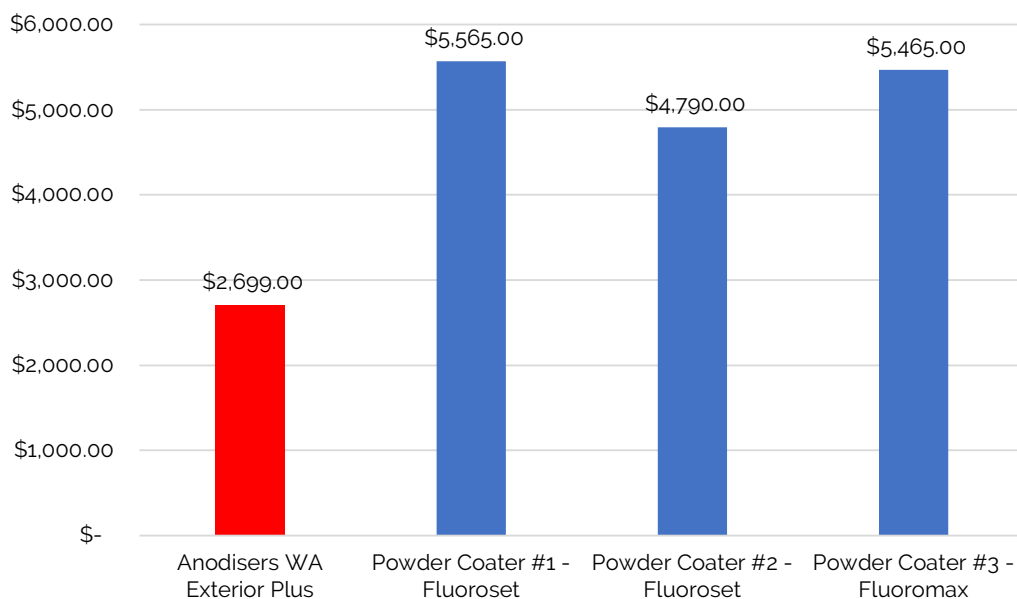

24 Items were compared including

- Geometric and Standard Glazing Extrusions
- Perforated 50% Sheets, Perforated 32% and 3mm Solid Sheets
- Pressed Aluminium
